From the Data Desk

Driving under the influence of alcohol crash fatalities and injuries per 100,000 population for each county within Region 4 from the Texas Department Transportation

Tobacco Talk

E-cigarettes are devices that simulate smoking by using a mechanical heating element, battery, or electronic circuit to deliver nicotine or other substances by inhalation. Tobacco companies have marketed e-cigarettes as a safer alternative to smoking and as a tool to help people quit smoking. However, the U.S. Food and Drug Administration has not approved any e-cigarette to aid in smoking cessation.

5.9 % of adults in Texas report currently using e-cigarettes in 2021.

Texas Department of State Health Services. (2022). 2021 Texas Behavioral Risk Factor Surveillance System.

8.2 % of 7th—12th graders in Texas reported using e-cigarettes in the past 30 days in 2022.

8.7 % of 7th—12th graders in Region 4 reported using e-cigarettes in the past 30 days in 2022.

Texas Department of State Health Services. (2022). 2021 Texas Youth Tobacco Survey.
